12 th	93.4%	2010
10 th	92%	2008

Projects Summary

1. Pulse App - ASP.NET Developer (Aug'14 - Jan'16)

Pulse App is a web dashboard used internally in Wipro to maintain people supply chain. This project is for development, maintenance of Pulse Application.

Responsibilities:

- Developing dynamic ASPX web pages using C#, ADO.NET & Web Services in Visual Studio 2012
- Involved in front-end page designing using HTML, CSS and jQuery
- Writing SQL queries for data retrieving, querying, storage and manipulation in Oracle 11g server
- Optimization of page execution time using C# - LINQ for querying objects

2. Limber - Full Stack Developer (Jan'16 to May'16)

As a part of NIIT Stackroute-Wipro Digital Full Stack Developer training, developed a collaborative Agile story management tool named Limber (limber.stackroute.in). Limber (internally called Fragile) is a Single page application built on AngularJs, and available on git: <https://github.com/stackroute/frAgile>

Responsibilities:

- Involved in Front-end UI design and routing to build a Single Page Application on AngularJs.
- Building the RESTful API calls to handle AJAX requests in backend using NodeJs and ExpressJs framework.
- Designing the NoSQL database using MongoDB to maintain data for Limber.
- Developing Real-time activity stream feature using socket.io
- Building Drag & drop feature for story management using jQuery and AngularJs

Achievements

Selected for NIIT Stackroute training for Full Stack Developers, by clearing Digithon challenge held by Wipro Digital.
